

Means and associations (r) with mask wearing ($R^2 = [.36; .42]$) (full sample, selection)

Putting on a mask, for example in a shop or on public transport, has already become automatic for some and it happens without thinking. For others, putting on a mask is not automatic at all, but requires conscious thinking and effort.

What consequences do you think it has if you use a face mask that you don't think you should use a face mask and who thinks not? In the following questions, by using a face mask, we mean holding a cloth or disposable face mask, surgical mask, or respirator on the face so that it covers the nose and mouth. The questions concern leisure time. My family and friends think I should
